Acoustic Field Technician

Environmental Monitoring Department - Remote

A.I.S., Inc. (AIS) is a national scientific services firm supporting maritime activities requiring certification of compliance with environmental regulations as well as collecting data for use by Federal, State, Municipal, and other government agencies along the US coastline. AIS is looking for Acoustic Field Technicians to support Empire Winds pile driving efforts.

Primary Function:

Working under the general direction of a Project Manager, the Acoustic Field Technician works offshore on a vessel, processing and reporting acoustic data and participating in the assembly, preparation, calibration, deployment, and retrieval of a variety of underwater acoustic instrumentation packages. This position requires travel and working rotations (30 days) at sea from June to December.

Duties/Responsibilities:

- Collect, process, analyze, and report acoustic measurement data.
- Download data from oceanographic equipment.
- Conduct routine mechanical and electrical assembly, disassembly, and maintenance and calibration of oceanographic instruments and moorings.
- Assist in the deployment and recovery of oceanographic equipment in the field.
- Unpack oceanographic instrumentation in preparation for shipping related to deployments.
- Clean and pack oceanographic instrumentation after recovery.
- Conduct required administrative tasks such as data logging and required paperwork.
- Adherence to quality and health & safety policies and procedures.

Compensation: Candidates will be paid an hourly rate to be negotiated, and total compensation will vary depending on candidates' depth of experience. This is a full-time position. **AIS benefits package includes health and dental insurance, vacation, sick and holiday benefits.**

Minimum Qualifications

- Must be legally entitled to work in the United States (US Citizen or hold a current valid work permit).
- Must have a valid US passport or US identification card with a validity of at least 6 months
- Minimum bachelor's degree specializing in physics, mathematics, engineering, computer science, biology or a related field or equivalent experience and education
- Minimum of 1 year sea-going experience required
- Experience with the operation of mechanical and electronic equipment
- Ability to understand, express and apply concepts and instructions of a general nature as well as somewhat technical/scientific/administrative precepts, concepts, methods, and procedures.
- Ability to perform physically and mentally demanding tasks.
- Ability to troubleshoot oceanographic instrumentation preferred.
- Demonstrated attention to detail.
- Excellent organizational skills.
- Excellent verbal and written communication skills with proficiency in English required.
- Ability to work in a team environment maintaining focus on work quality.
- Willingness and ability to learn.
- Skilled in standard software including Microsoft Outlook, Excel, Word, etc. and aptitude to learn and work with various industry specific software products.
