## West Coast Observer Jobs

Observers in the West Coast program work aboard commercial fishing boats collecting biological data on target and bycatch. They monitor marine mammal and sea bird interactions with fishing gear and, check vessel deliveries to verify species identification and weights. The National Marine Fisheries Service (NMFS) uses this information to set fishing quotas and monitor the health of fish stocks.

Boats in the West Coast fleet range in size from 18-foot longliners to over 70-foot trawlers. Working conditions vary widely and some vessels may not have bathrooms or showers.

Observers must be flexible, resourceful, able to work long hours, and strong enough to do some heavy lifting (up to 80 pounds). The workday is determined by the vessel's fishing schedule and NMFS sampling protocols, and can range from 5-15 hours a day. Trips last from 1 to 5 days and multiple back-to-back deployments are common. As with all our observer jobs, we encourage — and reward — repeat contracts.

For more details on the program and observer requirements, see

<https://www.saltwaterinc.com/job-openings/west-coast-groundfish-observer-jobs/>

composition.

- Provide fish ID and measurements.
- Collect biological samples.
- Monitor marine mammal and bird interactions.
- Document fishing activity (set times, positions, gear performance, etc.).
- Record and report all data to NMFS.
- Comply with all regulatory requirements.
- Carry out assigned special projects.

### Minimum Qualifications

General observer requirements, plus:

- Bachelors of Science in a biological science or limnology; or
- Valid NMFS certification; or
- Prior experience as a fisheries observer approved by ADF&G.
- One statistics course and one math course.
- College course using dichotomous (taxonomic) keys.
- A CPR and First Aid certification.

### Training
